[4:17:18 PM] raheel: *NSL API

[4:17:32 PM] Weekend Testing: One use of the tool I see is to see how many formats a particular locale supports

[4:17:47 PM] Balu: what is locale?

[4:18:00 PM] Weekend Testing: You can say language

[4:18:06 PM] Balu: ok

[4:18:18 PM] Weekend Testing: When I select the different languages, the format changes

[4:19:57 PM] raheel: it gives detail about extrens

[4:20:19 PM] raheel: og large number ad currency formats supported

[4:25:43 PM] Weekend Testing: Select Korean

[4:25:52 PM] Weekend Testing: and you will see boxes in Date fields.

[4:26:06 PM] Weekend Testing: Maybe because I don't have fonts

[4:26:19 PM] raheel: u need to install Korean language pack

[4:30:30 PM] raheel: still strugling

[4:30:44 PM] madhusudhan: i am not able to get it

[4:31:30 PM] Balu: I think we're supposed to use the info given from NLS API's tab as test data in our testing. Isn't it?

[4:32:47 PM] Weekend Testing: That would be one scenario.

[4:32:54 PM] Weekend Testing: but right now, what can we do?

[4:33:19 PM] Weekend Testing: I can think of using the tool to learn about different formats used & highlight them in a report

[4:34:52 PM] Balu: Can someone get the 'Apply' button enabled on the app?

WT67 Session Chat Transcript

[4:35:07 PM] Balu: what is expected when we apply some language?

[4:35:49 PM] Balu: that is to chnage the langguage on the tool.

[4:36:04 PM] Weekend Testing: Is anyone progressing ? or we can change the task

[4:36:46 PM] raheel: i dont find much scope to progress moreover in report we could just list down local names and language etc..

[4:37:11 PM] raheel: it will not b much related to testing

[4:37:25 PM] Weekend Testing: Akanksha, Balu?

[4:37:38 PM] Weekend Testing: Kahir.un.Nisa, Narasimha?

[4:56:20 PM] raheel: when we are drwing some text it sart playing (not sure if this word is apt)

[4:57:23 PM] Balu: when i said move, it is not exactly moving the drawing, the play doesn't head further

[4:58:01 PM] raheel: ohk..

[4:59:47 PM] Balu: when i completely paint the area where i'm expected to paint the stick man, the drawing moves very slow towards the box where he had to open it with a key

Learnt globalization is all about making your product global. In globalization testing, we're expected to Focus on function testing with any Culture/locale we'd like our app to be compatible with.

Any learning from this session

Was the first mission useful

WT67 Session Chat Transcript

Mission not successful. Couldn't understand why and how 'Text APIs tab' is useful for us in testing.

And any bugs for the second mission

Two bugs - <http://dl.dropbox.com/u/20061674/WT67report.doc>

overall experience -

It was difficult to understand what globalization testing is for me in 30 mins. I've never done this in my career. Good to spend some time on it.

[5:15:22 PM] Weekend Testing: Nice one Balu

[5:15:38 PM] Weekend Testing: What do you think we can change to make the mission more interesting?

[5:15:55 PM] Balu: I think I've missed this -

Any learning from this session

Globalisation testing, and a tool that would aid testers to perform it effectively.

[5:16:44 PM] Balu: [5:15 PM] Weekend Testing:

<<< What do you think we can change to make the mission more interesting? We should've given as prerequisite for the participants to read on globalisation testing before attending the session.

[5:16:53 PM] Balu: Of course when you put the mission that should be obvious.

[5:17:19 PM] Weekend Testing: ok

[5:17:30 PM] Balu: May be also apply it on a site which has been globalised

[5:17:45 PM] Weekend Testing: Good point
