[6/30/2012 5:30:47 PM] asha shivalingaiah: Good experience testing some unknown app without much background information and exploring what could break it..

[6/30/2012 5:33:56 PM] Murali Kathula: Weekend testing for the first time and it was a very good learning experience.Every weekend testing would be a challenge I guess and as of today I had not much problems in starting the testing of the tool

and all was well.Prepared a test report and mind map in parallel and sent it on time.n the whole it was

a very great experiance to be here.Learning a lot.I was just thinking that I will see how it goes being the first time before getting into the session but it all went well and became active as and when I started the testing.

[6/30/2012 5:34:00 PM] asha shivalingaiah: @abhinabv: yeah true

[6/30/2012 5:39:42 PM] Lavanya: Every weekend testing is challenging for me

I have a Mac osx and face issues when I have to install the window based application

I am still in the phase of learning new things and its fun to learn

I really appreciate the group for helping me every now and then when I get stuck.

My thanks to Abhinav and Ramesh:-)Special thanks to you Ajay for giving us such wonderful experience in the field of testing:)

[6/30/2012 5:39:56 PM] Ramesh: From my side it was nice feeling testing that application...Testing in limited time and sending report in ontime will give us challenge

Yes for desktop application, We should have one checklist with session

[6/30/2012 5:42:51 PM] Weekend Testing: yes @Lavanya

[6/30/2012 5:43:29 PM] Lavanya: If we know that most of the apps run only on windows then how can we find bugs with Mac OSX environment?

[6/30/2012 5:44:06 PM] Weekend Testing: you need to let the stakeholder know as soon as possible that as a tester, you are not equipped.

[6/30/2012 5:44:36 PM] Weekend Testing: @Abhinav: what did you mean by checklist?

[6/30/2012 5:45:25 PM] Lavanya: @ ajay-do you mean that it is possible to test the feature in any environment?If so, how do we test in an environment which is not compatible for the application?

[6/30/2012 5:45:40 PM] asha shivalingaiah: In my opinion...

1. OS supported

2. Browser supported

3. Prerequisites for installations(like java version, .net version)

[6/30/2012 5:46:45 PM] Murali Kathula: Sorry Ajay and all I have to go.will catch up with the chat later.

[6/30/2012 5:47:40 PM] Lavanya: that raises another question now- any website should be able to essentiallly function in all environments or not?if yes, why. if no, why?

[6/30/2012 5:47:42 PM] Weekend Testing: @Lavanya - I am not saying that it is possible to test any application on any environment. All I am saying is as a tester, one can inform immediately.

[6/30/2012 5:47:50 PM] Abhinav Sejpal: @ Ajay Before going to start on a new project for testing, we should have one strong list with Yes/ No options which will contain the information of the application support environment.

So, we could welcome the specify people for testing.

ok

[6/30/2012 5:48:09 PM] Weekend Testing: Wasn't a 1 hr enough for that?

[6/30/2012 5:48:13 PM] Weekend Testing: @Abhinav

[6/30/2012 5:48:44 PM] Murali Kathula: next time I will not keep anything immediately before and after the session.

[6/30/2012 5:48:57 PM] Murali Kathula: A lesson learnt.

[6/30/2012 5:49:06 PM | Edited 5:49:18 PM] Abhinav Sejpal: @Ajay it's more than enough but we shouldn't try to test as the Dev team said it's support the only windows Os.

[6/30/2012 5:49:42 PM] Weekend Testing: so, why not inform the stakeholders? who is the customer here?

[6/30/2012 5:49:49 PM] Abhinav Sejpal: .exe format won't support in Linux & mac

[6/30/2012 5:50:30 PM] Weekend Testing: yes, so what is the problem?

[6/30/2012 5:50:37 PM] Weekend Testing: isn't it a known issue?

[6/30/2012 5:51:26 PM | Edited 5:51:38 PM] Abhinav Sejpal: Stakeholders developed this app for window's Os only. :) hmm we can say known issue but we could install the Window os on linux or mac tooo

[6/30/2012 5:51:49 PM] Lavanya: Does the stakeholder not bother about environment other than windows?

[6/30/2012 5:52:01 PM] Lavanya: if yes, why?

[6/30/2012 5:52:22 PM] Weekend Testing: how will s(he) know unless its informed :|

[6/30/2012 5:52:56 PM] Lavanya: >how will s(he) know unless its informed :|

[6/30/2012 5:53:12 PM] Abhinav Sejpal: This app developed using native code .net 3.5 with platform dependent only. so it won't work for the other OS

[6/30/2012 5:53:25 PM] Weekend Testing: ok, lets take it offline.

[6/30/2012 5:53:33 PM] Abhinav Sejpal: :)

[6/30/2012 5:53:49 PM] Weekend Testing: Jasminka, Molnar, Rajesh, Rajiv, Ramesh

[6/30/2012 5:54:03 PM] Rajiv Meher: Yes Ajay.

[6/30/2012 5:54:05 PM | Edited 5:55:09 PM] Jasminka Puskar: Experience:

I've said this before it is hard to test when the Skype application is blinking due to new messages. I know I should focus on the mission, but you never know what important stuff might be written in the chat. If many people cannot use a selected application maybe the mission will change or maybe the alloted testing time will change. So I need to follow the Skype chat as well, but it does make it harder to test. Having said that, Skype is still a very good platform for this. Better than nothing. So I am happy with my completed work. I feel that I have tested as much as I could despite the blinking, time pressure and this being a new application to me. I also managed to write a test report and draw a feature testing mind map in time. I've learned from previous Skype testing sessions and this time I stopped 5 minute before to double check my report for spelling and to see if I missed something in the mind map. I am satisfied with my todayss efforts and about the fact that I am getting better at mind maps. So this was a great experience and will be good for my confidence during stressful testing times.

[6/30/2012 5:54:34 PM] Rajesh: yes ajay

[6/30/2012 5:55:27 PM] Abhinav Sejpal: [Friday, June 29, 2012 5:54 PM] Jasminka Puskar:

<<< Experience: (happy)

[6/30/2012 5:55:32 PM] Molnár Zoltán: sorry, Ajay, I switched to observer mode only once I did not manage to install .NET 2.0. To be honest I expected the technical problems when I checked the task for todat on the WT forum, but tried anyway.

<<< From my side it was nice feeling testing that application...Testing in limited time and sending report in ontime will give us challenge

[6/30/2012 5:57:34 PM] Weekend Testing: any mistakes you did this time which you will correct next time?

[6/30/2012 5:58:38 PM] Rajesh: learnt from others exp, that how to explore the things, and how to think diff scenarios and wat to do when we face problem during testing

[6/30/2012 5:58:49 PM | Edited 5:59:34 PM] Rajiv Meher: I didn't gave much time for mindmap. Will try to allot more time for mindmap and planning. So that I can cover more Testing.

[6/30/2012 5:59:19 PM] Jasminka Puskar: I want to think of more test ideas and see how deep I can really go when I don't test something familiar.

[6/30/2012 5:59:22 PM] Rajesh: yes, i hav not tried different major scenarios as like others and have to find lot of major issues

[6/30/2012 5:59:26 PM] Rajesh: in coming class

[6/30/2012 5:59:54 PM] Molnár Zoltán: @Sejpal: 'winetricks dotnet35' starts to install 2.0 for me, and it hits the same 64 bit problem. But I am going to play with it a little bit more, maybe manage to tweak somehow
