

# Rainlendar

## things learned from the web site

### features

- events
- tasks
- alarms
- being able to customize
- support different languages over 50 languages
- support cross platform
  - Windows
  - Mac
  - Linux
- compatible with third party calender google calender

## testing notes

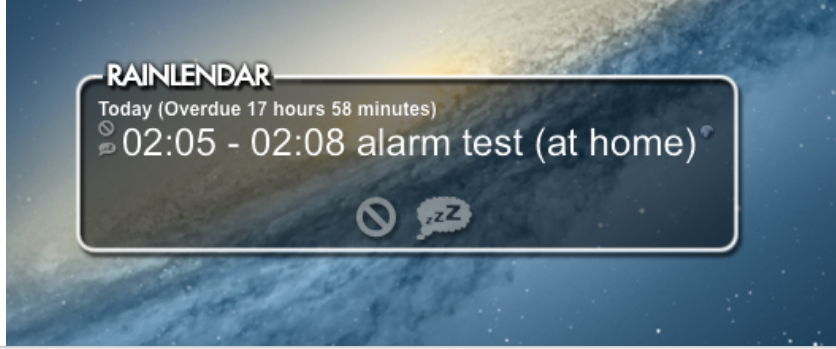

### events

add an event from menu bar All CRUD passed  
no issue raised here

### alarms

set start time 19:58 and net time 20:00 the pop alarm appeared as expected

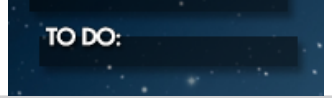

set start time 20:5 and 20:08 after I clicked 'OK' and then alarm popup appeared immediately

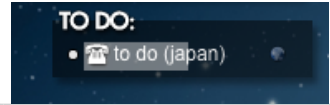

noticed the time became 02:05 - 02:08

### to do

added a to do by double clicking 'TO DO' section

after that changed progress feature to 50% noticed progress status appeared over the to do

### different skins

tried all three skins all the data I added appeared in different skins as expected
