[17:11:56] Weekend Testing: We have to use our time perfectly.. you can do as others share their report.

[17:12:08] Weekend Testing: Lets start .. with Debrief.

[17:12:17] Saurabh Kumar Sinha: Well Installation GUI is quite ok and intresting to know the software is developed by great QA giant com[any

[17:12:40] Saurabh Kumar Sinha: Installation and download is quite easy

[17:12:54] Saurabh Kumar Sinha: Memory management is well maintained

[17:13:26] Saurabh Kumar Sinha: Prerequisites is not handled properly for the installation.

[17:15:17] Jyothi: Do share your notes here or as a file.

[17:16:02] vinod.baradwaj: installation is very easy in chrome, it comes as a plugin for chrome which can be downloaded from the chrome store. it installs automatically.

taking screenshot of webpages are working like charm. editing options are great, no other screencapture tool offers this thing.

saving and uploading of the screencaps are good. The free hosting to host the screencaps is great and faster for sharing with others.

[17:17:15] vinod.baradwaj: the one thing which i noted is the keyboard shortcut for capturing the screenshot is not working, i tried with many settings still it failed.

[17:17:16] \*\*\* Dwarika Dhish Mishra sent qSnap.jpg \*\*\*

[17:17:30] Dwarika Dhish Mishra: i have mentioned all my observation here as mindmap

[17:18:20] Saurabh Kumar Sinha: [17:14:40] Saurabh Kumar Sinha: Its good to know the working location but quite confusing as the HTML is blank

[17:14:47] Weekend Testing: Share over there

[17:14:48] Saurabh Kumar Sinha: going on 2 mins

[17:15:19] Saurabh Kumar Sinha: kk

[17:15:29] Weekend Testing: write over there

[17:15:34] Weekend Testing: as Done. when u finish

[17:15:38] Saurabh Kumar Sinha: althouh got an JS error using the options

[17:18:56] Weekend Testing: Lets discuss on the Saurabh's:

[17:19:15] Weekend Testing: Then we move on to next.. okay ?

[17:19:44] Weekend Testing: [17:12] Saurabh Kumar Sinha:

<<< Well Installation GUI is quite ok and intresting to know the software is developed by great QA giant com[any

Installation and download is quite easy

Memory management is well maintained

Prerequisites is not handled properly for the installation.

[17:19:49] Dwarika Dhish Mishra: this is really nice tool to use but its installation and uninstallation not that smooth

[17:19:55] Dwarika Dhish Mishra: in IR

[17:19:59] Dwarika Dhish Mishra: \*IE

[17:20:19] Jyothi: Thanks for the mindmap on this DDM. This is nice.

[17:20:26] Dwarika Dhish Mishra: Thank u mam

[17:21:09 | Edited 17:21:24] Weekend Testing: @Saurabh: How do you see the memory management on this?

[17:22:18] Saurabh Kumar Sinha: i was talking about the installation memory management

[17:22:25] Saurabh Kumar Sinha: mostinstallers doent have

[17:22:54] Saurabh Kumar Sinha: as while installation it should be addon but it is using as a system physical memory

[17:23:27] Dwarika Dhish Mishra: ya this is good thing to noticed becuase here it was acting more like a standalone application

[17:23:40] Jyothi: Shift+Esc on chrome browser takes the user to the memory management.

[17:23:48] Saurabh Kumar Sinha: DDM: rightly said

[17:24:01] Saurabh Kumar Sinha: Jyothi: Nice finding

[17:24:06] Saurabh Kumar Sinha: report the same

[17:24:48] Weekend Testing: Lets move to Dwarika

[17:25:03] Saurabh Kumar Sinha: DDM:Please proceed

[17:25:09] Dwarika Dhish Mishra: ya have gone in more detail in its installation

[17:25:11] Saurabh Kumar Sinha: love to hear your findings

[17:25:43] Dwarika Dhish Mishra: we are not getting any error message like Qsnap is already installed when we are trying to install this add-on again

[17:25:46] Dwarika Dhish Mishra: after first installation

[17:25:49] Weekend Testing: Thanks DDM.. for using Mindmaps..

[17:26:02] Dwarika Dhish Mishra: @WT welcome

[17:26:37] Weekend Testing: Do you find issues..sharing the screen ?

[17:26:38] Dwarika Dhish Mishra: Second thing like other browser we are not able to remove add-on from IE browser

[17:26:48] Saurabh Kumar Sinha: DDM please share with me separatelias in my Skype i am not allowed to share any file or view any file

[17:27:02] Saurabh Kumar Sinha: this account is managed by my head office

[17:27:11] Dwarika Dhish Mishra: only thing that we can do is to disable the add-ons

[17:27:16] Weekend Testing: Saurabh.. will be putting all these on website.

[17:27:21] Saurabh Kumar Sinha: f9\

[17:27:22] Dwarika Dhish Mishra: @Saurabh Sure

[17:28:06] Weekend Testing: [17:26] Weekend Testing:

<<< Do you find issues..sharing the screen ?

[17:28:11] Dwarika Dhish Mishra: usability of Screensharing is not quite good

[17:28:16] Dwarika Dhish Mishra: ya i have tried

[17:28:37] Saurabh Kumar Sinha: i have tried and shared will share the link can u guys try to open the same

[17:28:38] Dwarika Dhish Mishra: we can use the same link to see the screen in another browser

[17:28:46] Saurabh Kumar Sinha: •<https://qsnapnet.com/snaps/o77fsdyz8th2gld>

•<https://qsnapnet.com/snaps/zspnebv2ya05dn2>

[17:28:58] vinod.baradwaj: i tried sharing.. it is working well

[17:29:38] Weekend Testing: Ok.any more findings Dwarika ?

[17:30:01] Dwarika Dhish Mishra: there is one issue that found

[17:30:09] Saurabh Kumar Sinha: although before sharing it requires the account in which if u use the Google account then it is updating the user first name and Last name in reverse order

[17:30:17] Dwarika Dhish Mishra: Go and disable the Qsnap

[17:30:17] Saurabh Kumar Sinha: anyone find this??

[17:30:22] Dwarika Dhish Mishra: in IE

[17:30:30] Saurabh Kumar Sinha: hmmm

[17:30:45] Saurabh Kumar Sinha: disable option is not present

[17:30:46] vinod.baradwaj: yes saurabh i observed it

[17:30:48] Dwarika Dhish Mishra: then again go to icon it is still there and when we are trying to capture screen then it is capturing blank page

[17:31:20] Dwarika Dhish Mishra: @Saurabh Go to Tools--> add-on--> Manage Add-on -> Select All --> Disable it

[17:32:16] Weekend Testing: oh good observation..

[17:45:17] Shouvik Roy: I tested using Safari on Win 7

[17:45:29] Weekend Testing: Cool.. would like to hear on this..

[17:45:39] Shouvik Roy: The installation is simple and user friendly enough

[17:45:54] Shouvik Roy: its added as an Add on to Safari

[17:46:12] Shouvik Roy: Then I went on with basic functionality of the app

[17:46:42] Shouvik Roy: First thing I noticed is that- qSnap doesn't capture scrollable websites perfectly

[17:47:10] Shouvik Roy: I have attached snapshots about this on my report

[17:47:25] Weekend Testing: Team, please go through for 2 mins

[17:47:35] Weekend Testing: the report..and discuss for 3 mins

[17:49:03 | Edited 17:49:12] Weekend Testing: hotkey - Good observation @sauvik - I have seen this while doing last week.

[17:49:22] Shouvik Roy: Thanks

[17:49:53] Shouvik Roy: Next major issue is that there is an offset between where the mouse is clicked and where the textbox appears

[17:50:57] Shouvik Roy: Faced similar issue when trying to move the textbox around

[17:51:04] Weekend Testing: Any views others on this ?

[17:51:37] Jyothi: [17:49] Shouvik Roy:

<<< Next major issue is that there is an offset between where the mouse is clicked and where the textbox appears

[17:52:18] Jyothi: Could you explain this please

[17:53:06] Jyothi: Is this the first time or subsequent click only.

[17:53:37] Shouvik Roy: I am not sure if this is Safari specific or not, when I try to create a textbox on the snap shot, the textbox is created a few cm away from where I actually clicked

[17:53:56] vinod.baradwaj: it is like that in chrome also

[17:53:56] Shouvik Roy: You can see the snap shot on my report

[17:54:45] Weekend Testing: Lets go for Vinod's ?

[17:54:55] Shouvik Roy: oh I have one more

[17:55:02] Weekend Testing: @Vinod .. please share your findings

[17:55:05] Jyothi: Yes, a similar observation on chrome as well. Need to investigate on why though.

[17:55:28] Shouvik Roy: Callout items doesn't allow me to enter text inside it

[17:56:29] vinod.baradwaj: installation is very easy in chrome, it comes as a plugin for chrome which can be downloaded from the chrome store. it installs automatically. the same for uninstall also..

[17:56:41] Jyothi: Looks like a behaviour specific to Safari. Anybody else notice it on other browsers, chrome calls out and can input text.

[17:57:12] vinod.baradwaj: inn chrome im able to enter text into callout

[17:57:23] Dwarika Dhish Mishra: In IE text was eclipsing at some extent

[17:57:28] Weekend Testing: @lets see the Vinods

[17:57:33] Weekend Testing: we have three mins left

[18:03:30] vinod.baradwaj: editing and uploading it to free hosting service is really good in this tool.. it can be used for easy and faster way of sharing screencaps

[18:03:55] Dwarika Dhish Mishra: ya this add-in is really very helpful

[18:04:12] Jyothi: As noted in qSnap.txt a few glitches in qSnap- Like select option is available but the entire screen is saved.

[18:05:10] Jyothi: ~saved

[18:05:27] Jyothi: Fireshot provides options which are unlike this.

[18:05:34] Dwarika Dhish Mishra: i think more options should be available like GIF, PNG and BMP

[18:05:46] Saurabh Kumar Sinha: @DDM: same i feel

[18:05:55] Jyothi: Like to capture entire page or a part of a page.

[18:06:14] Jyothi: And to edit, crop and save in a format which the user wishes to and to a location user wishes to.

[18:06:33] Weekend Testing: Yes..when i explored this as on the day it launched - i felt the same things.. you guys have given more explanation here

[18:06:35] vinod.baradwaj: when more than one picture is shared it generates separate links for each one.. a album kind of thing can be developed when more than one picture is shared

[18:07:16] Saurabh Kumar Sinha: @Jyothi: I dont think the Corp option in this addon is having any standard...i WAS confused how i can get out from corp screen

[18:07:28] Jyothi: @vinod thats a suggestion worth taking forward (y)
