[20/12/2015 15:12:59] Emma Keaveny: Whoop Whoop!

[20/12/2015 15:13:06] Emma Keaveny: Bring on the lean coffee

[20/12/2015 15:13:09] Emma Keaveny: altho I have tea :D

[20/12/2015 15:13:13] Weekend Testing Europe: Weekend Testing Europe added Trisha agarwal to this conversation

[20/12/2015 15:13:17] Weekend Testing Europe: Hi Emma!

[20/12/2015 15:13:22] Weekend Testing Europe: Hope you're feeling festive

[20/12/2015 15:13:25] Emma Keaveny: hey hey :)

[20/12/2015 15:13:30] Emma Keaveny: I am as festive as I can be :)

[20/12/2015 15:13:31] Emma Keaveny: hehehehehe

[20/12/2015 15:13:37] Daniel Billing: Hello :)

[20/12/2015 15:13:38] Emma Keaveny: already bought myself Xmas pressies

[20/12/2015 15:13:39] Emma Keaveny: Imfao

[20/12/2015 15:13:41] Emma Keaveny: Hiya Dan :)

[20/12/2015 15:13:46] Weekend Testing Europe: Hi Dan

[20/12/2015 15:13:59] Trisha agarwal: Hi Everyone

[20/12/2015 15:14:04] Emma Keaveny: Hi Trisha

[20/12/2015 15:14:23] Trisha agarwal: Hi Emma .

[20/12/2015 15:14:31] Neil Taylor: Hi All.

[20/12/2015 15:14:32] Trisha agarwal: Wish you all advance christmas and New Year :)

[20/12/2015 15:14:38] Daniel Billing: Hope you are all well
[20/12/2015 15:14:42] Emma Keaveny: hey hey Beil
[20/12/2015 15:14:45] Emma Keaveny: Neil
[20/12/2015 15:14:46] Emma Keaveny: lol
[20/12/2015 15:14:59] Daniel Billing: I'm downstairs with Rae, she's asleep, I have Agents of Shield on
[20/12/2015 15:15:09] Daniel Billing: But thought some learning would be a good idea
[20/12/2015 15:15:16] Emma Keaveny: lol
[20/12/2015 15:15:24] Emma Keaveny: Imfao
[20/12/2015 15:15:24] Emma Keaveny: well I have come dine with me and boy are they bitvhy
[20/12/2015 15:15:29] Emma Keaveny: this is why I dont cook for anyone!!!
[20/12/2015 15:17:56] Daniel Billing: Do we have some new folks here today?
[20/12/2015 15:18:07] Emma Keaveny: I hope so
[20/12/2015 15:18:15] Emma Keaveny: Imfao
[20/12/2015 15:18:15] Emma Keaveny: getting tired of seeing all the same names :P
[20/12/2015 15:18:31] Rares Coste: Rares Coste joined the conversation
[20/12/2015 15:18:58] Weekend Testing Europe: Hi Rares :)
[20/12/2015 15:19:07] Rares Coste: hi guys
[20/12/2015 15:19:19] Emma Keaveny: Hey Rares :)
[20/12/2015 15:20:32] Emma Keaveny: Emma Keaveny added Denise Bjornn to this conversation
[20/12/2015 15:23:19] Thomas Ponnet: I'm rather old, nothing new here 😊
[20/12/2015 15:23:39] Weekend Testing Europe: Haha. Hi Thomas, good to see you
[20/12/2015 15:23:45] Weekend Testing Europe: Just ignore Emma :D
[20/12/2015 15:23:50] Emma Keaveny: eh!
[20/12/2015 15:23:53] Emma Keaveny: Imfao
[20/12/2015 15:23:53] Emma Keaveny: You dont ignore me
[20/12/2015 15:23:59] Emma Keaveny: :P
[20/12/2015 15:24:08] Weekend Testing Europe: You, and your being bored of us old-timers
[20/12/2015 15:24:31] Thomas Ponnet: I'm naturally ignorant. No problem there...
[20/12/2015 15:25:02] Emma Keaveny: lol
[20/12/2015 15:25:04] Rares Coste: old timers...come on you are not that old :P
[20/12/2015 15:25:11] Emma Keaveny: <--- Loves the spotlight :P
[20/12/2015 15:25:23] Weekend Testing Europe: Always causing a stir
[20/12/2015 15:25:25] Emma Keaveny: hehehe
[20/12/2015 15:25:28] Emma Keaveny: this is why I come here
[20/12/2015 15:25:35] Emma Keaveny: sure it wouldbnt be the same otherwise
[20/12/2015 15:25:38] Emma Keaveny: watch the damn typos
[20/12/2015 15:25:39] Emma Keaveny: Imfao
[20/12/2015 15:27:29] Thomas Ponnet: Just realised that the last session is on today and I can't make it. A bit more advanced warning really would be nice!
[20/12/2015 15:27:50] Thomas Ponnet: Got to go in 5 mins
[20/12/2015 15:27:55] Emma Keaveny: Booooo
[20/12/2015 15:27:57] Weekend Testing Europe: Ah, sorry to hear that Thomas
[20/12/2015 15:27:57] Denise Bjornn: No harm in jumping right into things I suppose? :)

Testing is obviously one of many steps leading towards a finished product, what other areas may be helpful to learn more about in order to make a testers job easier? For example, a basic understanding of coding may be helpful, yes?

[20/12/2015 15:28:28] Weekend Testing Europe: Thomas, I'll make sure you're on our mailing list. We usually announce sessions at least a week in advance

[20/12/2015 15:28:57] Rares Coste: @Denise - it should be usefull /helpfull

[20/12/2015 15:29:03] Thomas Ponnet: I know, only saw the Twitter msg from an hour ago

[20/12/2015 15:29:37] Weekend Testing Europe: We'll aim to get back on track for January. Hopefully see you at the next session

[20/12/2015 15:30:02] Thomas Ponnet: That would be great ☺

[20/12/2015 15:30:22] Weekend Testing Europe: Welcome to WETU-64 everyone!

[20/12/2015 15:30:42] Daniel Billing: Good to be here. It's been a while

[20/12/2015 15:30:48] Emma Keaveny: Hell yea its good to be here!

[20/12/2015 15:30:48] Weekend Testing Europe: This will be our final session for 2015 so we thought we'd wrap up with a relaxed, and hopefully fun session

[20/12/2015 15:31:02] Weekend Testing Europe: Let's kick things off with a quick round of intros...

[20/12/2015 15:31:48] Trisha agarwal: Hi I am Trisha from India Bangalore. I have 2.7+ years of experience in testing . I tweet @trisha_1212

[20/12/2015 15:31:53] Weekend Testing Europe: I'm Amy Phillips, I'll be facilitating today. Normally I'm test lead at Songkick, a music ticketing company based in Lodon. You can find me on Twitter @itjustbroke

[20/12/2015 15:32:12] Daniel Billing: I'm Dan Billing. @thetestdoctor on Twitter. I work at NewVoiceMedia, mainly doing security testing. I do speaking etc, and help run this. Testing is fun!

[20/12/2015 15:32:23] Emma Keaveny: I am Emma...I say fuck a lot!! :) And I love testing

[20/12/2015 15:33:00] Trisha agarwal: (y)

[20/12/2015 15:33:02] Neil Taylor: Hi I'm Neil, Tester/Test Lead currently working in Uckfield for Interica.

@neilt83

[20/12/2015 15:33:47] Denise Bjornn: Hi I am Denise, Emma tagged me in, don't worry, I say fuck less often. :P

[20/12/2015 15:33:54] Emma Keaveny: :D

[20/12/2015 15:34:02] Daniel Billing: (headbang)

[20/12/2015 15:34:05] Emma Keaveny: lol

[20/12/2015 15:34:07] Weekend Testing Europe: Hah, welcome Denise

[20/12/2015 15:34:23] Emma Keaveny: Just so you know Denise is very new to testing...she has a lot of questions..and has a great curiosity for it :)

[20/12/2015 15:34:46] Trisha agarwal: +1

[20/12/2015 15:35:02] Weekend Testing Europe: Nice :) Hopefully we'll all learn something today

[20/12/2015 15:35:10] Emma Keaveny: :D

[20/12/2015 15:35:22] Rares Coste: I am Ra Coste and i m on the qa for a while and won't go away form qa :)

[20/12/2015 15:35:36] Daniel Billing: Welcome to testing Denise

[20/12/2015 15:35:56] Weekend Testing Europe: Nice, now that we all know each other we can get started.

[20/12/2015 15:37:45] Weekend Testing Europe: Today we're going to have a festive Lean Coffee session. For those of you who haven't been to a lean coffee session

before its a structured discussion using suggested and voted for discussion topics.
[20/12/2015 15:37:56] Weekend Testing Europe: The most popular topic gets discussed for a set amount of time. At the end of that time we vote again to decide whether to discuss for longer or to move on to the next topic.
[20/12/2015 15:38:52] Weekend Testing Europe: We're going to use <http://www.ideaboardz.com/for/WTEU%20Lean%20Coffee/2444317> to collect ideas
[20/12/2015 15:39:15] Weekend Testing Europe: Feel free to start adding cards with your topic idea to the 'Topics' column
[20/12/2015 15:39:36] Weekend Testing Europe: Let me know if you have a question about what we're doing or why...:)
[20/12/2015 15:40:52] Weekend Testing Europe: There are no points for finding bugs in Ideaboardz :D
[20/12/2015 15:41:15] Emma Keaveny: lol
[20/12/2015 15:41:40] Trisha agarwal: This message has been removed.
[20/12/2015 15:43:17] Emma Keaveny: lol Trisha you didnt like the ping?
[20/12/2015 15:45:33] Weekend Testing Europe: Weekend Testing Europe has ejected Trisha agarwal from this conversation
[20/12/2015 15:45:40] Weekend Testing Europe: Weekend Testing Europe added Trisha agarwal to this conversation
[20/12/2015 15:45:44] Weekend Testing Europe: Ping Trisha
[20/12/2015 15:49:18] Weekend Testing Europe: ok everyone, have you added all of your topic ideas?
[20/12/2015 15:49:27] Weekend Testing Europe: Ready to vote?
[20/12/2015 15:49:44] Emma Keaveny: lets do this
[20/12/2015 15:49:47] Trisha agarwal: Yes, i revieced the ping
[20/12/2015 15:49:50] Trisha agarwal: +1
[20/12/2015 15:49:54] Trisha agarwal: thank you
[20/12/2015 15:49:58] Weekend Testing Europe: Great :)
[20/12/2015 15:50:21] Weekend Testing Europe: ok, you each get 2 votes. Just click the little + on the bottom of the topic card
[20/12/2015 15:50:32] Weekend Testing Europe: We'll discuss the most voted for topic first
[20/12/2015 15:51:44] Trisha agarwal: Okay
[20/12/2015 15:51:51] Weekend Testing Europe: I'm going to pretend the number of votes on the cards matches the number of people in this session... :D
[20/12/2015 15:51:58] Emma Keaveny: lmfao
[20/12/2015 15:52:08] Emma Keaveny: :\$ oops
[20/12/2015 15:52:09] Emma Keaveny: lol
[20/12/2015 15:52:23] Denise Bjornn: Same oops here
[20/12/2015 15:52:28] Denise Bjornn: Lol
[20/12/2015 15:52:33] Emma Keaveny: lol
[20/12/2015 15:52:34] Weekend Testing Europe: OK, who suggested the topic of 'Specialisms in testing'?
[20/12/2015 15:52:43] Emma Keaveny: bet it was Dan?
[20/12/2015 15:52:44] Daniel Billing: That would be me i
[20/12/2015 15:52:45] Emma Keaveny: :P
[20/12/2015 15:52:50] Emma Keaveny: see!!
[20/12/2015 15:52:52] Emma Keaveny: I knew it!
[20/12/2015 15:52:54] Emma Keaveny: lol
[20/12/2015 15:53:38] Weekend Testing Europe: Any takers? Who voted for this one?

[20/12/2015 15:54:21] Rares Coste: i did

[20/12/2015 15:54:23] Emma Keaveny: Are there many specialities within testing??

[20/12/2015 15:54:39] Rares Coste: beacause i wanted to know what is this all about more exact

[20/12/2015 15:54:40] Rares Coste: :)

[20/12/2015 15:54:51] Emma Keaveny: Dan maybe you want to elaborate a bit more?

[20/12/2015 15:54:53] Weekend Testing Europe: Great. Does anyone here specialise?

[20/12/2015 15:55:37] Weekend Testing Europe: I think everyone specialises really. We all know how to test on particular projects or scenarios

[20/12/2015 15:55:54] Denise Bjornn: Does this mean there are different types of testing or different ways of testing?

[20/12/2015 15:55:58] Weekend Testing Europe: I specialise in web and mobile testing

[20/12/2015 15:55:58] Daniel Billing: Hi, yes. This year and the last 2/3 years I've been training heavily in security testing

[20/12/2015 15:56:10] Weekend Testing Europe: Great question, Denise. I think both

[20/12/2015 15:56:35] Daniel Billing: My main problem with it is it brings many biases

[20/12/2015 15:56:43] Weekend Testing Europe: I also specialise in lean and agile approaches to testing

[20/12/2015 15:56:44] Daniel Billing: Which I'm trying to wrestle with

[20/12/2015 15:56:52] Weekend Testing Europe: How so Dan?

[20/12/2015 15:57:40] Daniel Billing: Well, I can't seem to take my security hat off, so that when I'm doing other testing, I can't help but see and think of security issues

[20/12/2015 15:57:46] Denise Bjornn: Lean and agile testing is different from other forms in what ways?

[20/12/2015 15:57:57] Daniel Billing: Maybe that's a personal issue I have

[20/12/2015 15:58:27] Weekend Testing Europe: Denise, they're very similar. Agile has more defined stages (following the manifesto, making sure you always retrospect, stand up etc). Lean is much more about doing whatever is needed.

[20/12/2015 15:58:52] Weekend Testing Europe: Dan, interesting. Is that because you think people will judge if you don't focus on the security side?

[20/12/2015 15:59:27] Emma Keaveny: Dan do you feel you could be missing other opportunities to learn about the product because you cant switch testing areas?

[20/12/2015 15:59:32] Daniel Billing: Not really judgement, it's because I've just been focussing solidly on security

[20/12/2015 15:59:50] Daniel Billing: I find it hard very hard to context switch

[20/12/2015 16:00:17] Neil Taylor: Isn't that one of the benefits of specialising in something that even if you do other forms of testing you still have an eye out for issues that are related to where you have a lot of knowledge.

[20/12/2015 16:00:18] Emma Keaveny: So is it better to stay with the security testing and let other testers test other areas?

[20/12/2015 16:00:42] Daniel Billing: I've developed a reputation and knowledge/skill in that area - so maybe that is somewhat the case though Amy

[20/12/2015 16:00:51] Weekend Testing Europe: Neil, I think so.

[20/12/2015 16:01:10] Weekend Testing Europe: Dan, I imagine there would be a certain amount of pressure.

[20/12/2015 16:01:35] Trisha agarwal: how about you never felt i missing other kind of bugs for example usability or others , if we focus on specialist ?

[20/12/2015 16:01:38] Daniel Billing: Good point Neil

[20/12/2015 16:02:19] Weekend Testing Europe: So should we seek to become specialists or not?

[20/12/2015 16:02:19] Daniel Billing: I still see those issues, but sometimes I miss them - I've recently missed some nasty issues because they weren't on my personal radar

[20/12/2015 16:02:51] Daniel Billing: There is the concept of T shaped testers

[20/12/2015 16:02:52] Trisha agarwal: how do you deal then as it an important issue missed ?

[20/12/2015 16:02:58] Daniel Billing: Has anyone heard of that?

[20/12/2015 16:03:03] Trisha agarwal: no

[20/12/2015 16:03:08] Emma Keaveny: T shaped testers?

[20/12/2015 16:03:25] Weekend Testing Europe: Yep, Dan Ashby has a great talk on T shaped testers

[20/12/2015 16:03:29] Denise Bjornn: I take it specialized testing is more helpful when working in a group setting, this way others have the other bases covered?

[20/12/2015 16:03:33] Daniel Billing: Yeah. You have the base set of skills you can build on. The top of the T

[20/12/2015 16:03:52] Daniel Billing: And the specialist areas - whatever that is - which is the leg of the T

[20/12/2015 16:04:10] Daniel Billing: Denise, yes that is true

[20/12/2015 16:04:36] Weekend Testing Europe: I think specialism becomes more important if you freelance too

[20/12/2015 16:04:53] Trisha agarwal: +1

[20/12/2015 16:05:04] Weekend Testing Europe: Ok, we're out of time for this topic. Do you want to discuss for longer or move on?

[20/12/2015 16:05:13] Trisha agarwal: and i do agree with Dan base skills is must and top of that specailist

[20/12/2015 16:05:27] Denise Bjornn: Just to get a bigger picture, what are some example or areas of expertise in the testing community, beyond security?

[20/12/2015 16:05:50] Daniel Billing: I'm happy to move on

[20/12/2015 16:06:22] Weekend Testing Europe: performance, accessibility, domain, tools, it's pretty endless @Denise.

[20/12/2015 16:06:41] Daniel Billing: Yep - lots to choose from

[20/12/2015 16:06:51] Weekend Testing Europe: ok, with just one vote, we're moving on.....

[20/12/2015 16:06:57] Emma Keaveny: lol

[20/12/2015 16:07:02] Emma Keaveny: thats all it took...1 vote :)

[20/12/2015 16:07:18] Daniel Billing: It's called Danocracy

[20/12/2015 16:07:22] Trisha agarwal: 2 Vote

[20/12/2015 16:07:27] Weekend Testing Europe: no one voted against...

[20/12/2015 16:07:38] Emma Keaveny: :)

[20/12/2015 16:07:43] Weekend Testing Europe: Topic two "How do you get your foot in the testing door if you have no experience or "certifications"?

[20/12/2015 16:07:51] Weekend Testing Europe: Who suggested this one?

[20/12/2015 16:07:53] Emma Keaveny: I did :)

[20/12/2015 16:07:54] Daniel Billing: Ooh good one

[20/12/2015 16:07:59] Emma Keaveny: I was very lucky

[20/12/2015 16:08:01] Daniel Billing: Chicken/egg

[20/12/2015 16:08:09] Emma Keaveny: but if I had to do it again I would have no idea how to get in the door

[20/12/2015 16:08:29] Daniel Billing: Some folks transition from other roles in a

company

[20/12/2015 16:08:32] Emma Keaveny: I had sent loads of CV's...got very lil reponse

[20/12/2015 16:08:53] Daniel Billing: They might have been in customer support or tech support

[20/12/2015 16:09:01] Weekend Testing Europe: I went for a cheeky but lucky approach - I was studying testing as part of my degree and emailed every single tester who I could find on the internet. One of them ran a testing company and offered me work experience. This led to a junior testing position.

[20/12/2015 16:09:10] Emma Keaveny: but...

[20/12/2015 16:09:16] Emma Keaveny: what if you are from a different career

[20/12/2015 16:09:22] Emma Keaveny: changing into this role

[20/12/2015 16:09:27] Emma Keaveny: its not as easy

[20/12/2015 16:09:37] Daniel Billing: I trained as a teacher, left teaching, got a job in a call centre

[20/12/2015 16:09:47] Weekend Testing Europe: When I'm hiring I think the most important thing is enthusiasm and a willingness to learn. The easiest way to prove you're willing to learn is to go and learn something.

[20/12/2015 16:09:48] Daniel Billing: Then got an internal transfer

[20/12/2015 16:10:09] Weekend Testing Europe: Dan, I've heard of many people going that way. Seems to work well

[20/12/2015 16:10:54] Daniel Billing: But I had to do other things to make that happen

[20/12/2015 16:11:07] Daniel Billing: Learned web dev and html in my spare time

[20/12/2015 16:11:17] Weekend Testing Europe: I know a tester who did a development apprenticeship and through the course contacts found a part time testing job. He's now decided to go fulltime into testing

[20/12/2015 16:11:55] Denise Bjornn: How often is a company going to be willing to put in the time to train someone from the ground up though? Seems like a risky business move to even me and I am the one wanting it to happen lol

[20/12/2015 16:12:03] Emma Keaveny: You know it almost sounds like a calling...if you are meant to test...there will always be a way :)

[20/12/2015 16:12:51] Weekend Testing Europe: Denise, I think it depends. Large companies do it all the time. Less common in small companies. Being able to demonstrate your ability and willingness to learn is key.

[20/12/2015 16:12:53] Daniel Billing: Often they want to recruit someone with less experience as they are cheaper to recruit and then pay for - investment in training comes later

[20/12/2015 16:13:03] Trisha agarwal: <http://www.slideshare.net/balajiselvaganesh/software-tester-28106256>? Just found this slides :)

[20/12/2015 16:13:10] Weekend Testing Europe: Dan, yep that's true.

[20/12/2015 16:13:18] Daniel Billing: There didn't appear to be many options when I first started - for learning

[20/12/2015 16:13:25] Daniel Billing: Other than the mainstream

[20/12/2015 16:13:35] Weekend Testing Europe: Trisha, nice slides

[20/12/2015 16:14:24] Weekend Testing Europe: So.... are we done with this one? Ready to move on?

[20/12/2015 16:14:40] Denise Bjornn: Ready! :)

[20/12/2015 16:14:44] Weekend Testing Europe: (y)

[20/12/2015 16:14:47] Emma Keaveny: :D

[20/12/2015 16:14:48] Trisha agarwal: +1

[20/12/2015 16:14:50] Emma Keaveny: +1

[20/12/2015 16:15:00] Trisha agarwal: Thank you Ammy
[20/12/2015 16:15:03] Weekend Testing Europe: Never switch between Slack and Skype :D
[20/12/2015 16:15:12] Emma Keaveny: lol
[20/12/2015 16:15:17] Trisha agarwal: lol .
[20/12/2015 16:15:17] Daniel Billing: (rock)
[20/12/2015 16:15:47] Weekend Testing Europe: Ok Automated testing! Anyone do any automation as part of their testing?
[20/12/2015 16:16:41] Trisha agarwal: +1
[20/12/2015 16:16:51] Trisha agarwal: i do , using selenium
[20/12/2015 16:16:58] Denise Bjornn: Automated? Could we define automated testing? Almost sounds as if a person may not be needed lol
[20/12/2015 16:17:10] Emma Keaveny: ooooooooooooooh
[20/12/2015 16:17:11] Emma Keaveny: lol
[20/12/2015 16:17:12] Weekend Testing Europe: Ah yes, Denise very good suggestion
[20/12/2015 16:17:16] Emma Keaveny: here we go
[20/12/2015 16:17:18] Emma Keaveny: ;)
[20/12/2015 16:17:22] Weekend Testing Europe: anyone want to have a go?
[20/12/2015 16:17:33] Weekend Testing Europe: Then we'll all jump on you :D
[20/12/2015 16:18:19] Trisha agarwal: Automated testing is to reduce the manual effort for every build/ earlier check for blocker , but we cant find a new bugs or put a new thought to a devloping product
[20/12/2015 16:18:19] Daniel Billing: Shame Richard isn't here
[20/12/2015 16:18:28] Trisha agarwal: +1
[20/12/2015 16:18:34] Emma Keaveny: Richard missed his chance
[20/12/2015 16:18:39] Weekend Testing Europe: He did
[20/12/2015 16:18:47] Weekend Testing Europe: Trisha, that's pretty good
[20/12/2015 16:18:55] Weekend Testing Europe: Anyone want to add or remove from it?
[20/12/2015 16:18:56] Trisha agarwal: Thank you
[20/12/2015 16:19:09] Emma Keaveny: Denise does that make sense?
[20/12/2015 16:20:32] Denise Bjornn: Just an ironic thought here...but suppose it was a testers job to test the automated software developed to test software. Traitor. I hate him/her already.
[20/12/2015 16:20:32] Daniel Billing: It's not about reducing cost, by doing less "manual" testing. It's all testing, just testing we can programmatically
[20/12/2015 16:20:37] Daniel Billing: Maybe?
[20/12/2015 16:20:45] Denise Bjornn: Ehm..and yes that makes sense. Lol
[20/12/2015 16:21:24] Emma Keaveny: automated checking can never replace a person...you will always need a human eye on the software you test
[20/12/2015 16:21:35] Emma Keaveny: automation does help, but its part of your toolbox
[20/12/2015 16:21:42] Denise Bjornn: Why?
[20/12/2015 16:22:09] Emma Keaveny: jus beacuse an automated checks something and passes it, doesnt always mean its right...
[20/12/2015 16:22:18] Daniel Billing: Humans can make judgements - at the moment, machines can't do that so well
[20/12/2015 16:22:20] Emma Keaveny: there are certain skills testers have that you simply cant program
[20/12/2015 16:22:39] Daniel Billing: Indeed - green builds are a guide, not an

absolute

[20/12/2015 16:22:40] Denise Bjornn: Such as?

[20/12/2015 16:22:42] Trisha agarwal: to catch the earlier bugs , let example function : Login was working from 1st build but now the build shared by dev , Login function is screwed

[20/12/2015 16:23:45] Trisha agarwal: or we wont check in every particular build Examples : min and maxium character for Login pages , Null values kind of test .. as we have many new functionality to test and that where automated checks helps

[20/12/2015 16:23:46] Weekend Testing Europe: So should we always have automated tests?

[20/12/2015 16:24:01] Trisha agarwal: Yes, i feel Important ones .

[20/12/2015 16:24:24] Neil Taylor: I think automation can give you useful information to tell whether there is something worthy of further investigation. But its only as good as what you have automated in the first place.

[20/12/2015 16:24:34] Emma Keaveny: "always" hmm..depends on what you are testing and what you want to get out of the autoamtion

[20/12/2015 16:24:35] Daniel Billing: We automated what is appropriate and as much of what can be automated

[20/12/2015 16:24:57] Emma Keaveny: *automation

[20/12/2015 16:25:11] Daniel Billing: A lot of software needs human interactions - the telephony software I work on for example

[20/12/2015 16:25:27] Weekend Testing Europe: Any tips for getting started with automation?

[20/12/2015 16:25:30] Trisha agarwal: How do you take the judgement ? I just wanted to learn

[20/12/2015 16:25:42] Daniel Billing: However, by making the software more testable we can make it automatable

[20/12/2015 16:25:52] Daniel Billing: Good coders needed

[20/12/2015 16:26:01] Daniel Billing: Our devs write the tests

[20/12/2015 16:26:08] Weekend Testing Europe: How can we make it more testable, Dan?

[20/12/2015 16:26:17] Daniel Billing: The volume we have means we need them to do that

[20/12/2015 16:26:25] Trisha agarwal: Email Id to subscribe :selenium-users@googlegroups.com(To ask question)

Blogs to follow(In blogs they have mentioned from set-up and the common problem we face) : 1. toolsqa.com 2. <http://www.abodeqa.com/> and many more ..

Books is attached : Webdriver pratical Guides

Videos :<http://www.seleniumtests.com/p/free-selenium-training.html> http://www.youtube.com/channel/UCRTSTOpRhGUN5ETV1Z_gJWQ

[20/12/2015 16:26:46] Trisha agarwal: I have gone through all thes to learn automated way of checks

[20/12/2015 16:26:49] Daniel Billing: Appropriate hooks for the tools for example - naming conventions and practices for development of objects

[20/12/2015 16:27:09] Daniel Billing: Automate data setup

[20/12/2015 16:27:21] Daniel Billing: Predefined data sets

[20/12/2015 16:27:27] Weekend Testing Europe: Automate error log collection and summarising

[20/12/2015 16:27:36] Daniel Billing: Yep, lots of that

[20/12/2015 16:27:37] Trisha agarwal: +1

[20/12/2015 16:27:42] Weekend Testing Europe: Automated tools are often an easier

place to start

[20/12/2015 16:27:47] Denise Bjornn: Hmm...so maybe automation is something only used in certain cases, where a human deems it necessary? So a human will always be needed to set the process off, and decide if the outcome is adequate?

[20/12/2015 16:28:06] Denise Bjornn: Still stuck on the need for people, sorry lol

[20/12/2015 16:28:14] Daniel Billing: We put in hooks for our monitoring tools which allow testing in production too, but that's a different topic

[20/12/2015 16:28:59] Weekend Testing Europe: Denise, not always. Some things are very easy to define. API testing for example - an API is used by other machines so there are no human usability or accessibility requirements. Much easier to automate all the testing.

[20/12/2015 16:29:17] Weekend Testing Europe: Web testing is testing something that will be used by humans. You probably won't manage to automate all the testing.

[20/12/2015 16:29:30] Trisha agarwal: +1

[20/12/2015 16:30:21] Denise Bjornn: I see. So testing is too broad to be covered by a linear thinking system like automation.

[20/12/2015 16:30:38] Weekend Testing Europe: Denise, that's right. We're looking for so many different things.

[20/12/2015 16:31:09] Weekend Testing Europe: OK we're out of time for this one. Continue discussing or move on???

[20/12/2015 16:31:15] Trisha agarwal: +1

[20/12/2015 16:31:20] Emma Keaveny: +1

[20/12/2015 16:31:36] Weekend Testing Europe: Does that mean discuss or move?

[20/12/2015 16:31:39] Emma Keaveny: lol

[20/12/2015 16:31:43] Emma Keaveny: well I don't mind moving on

[20/12/2015 16:31:45] Trisha agarwal: Move on

[20/12/2015 16:31:49] Weekend Testing Europe: Cool.

[20/12/2015 16:32:06] Weekend Testing Europe: Conferences!

[20/12/2015 16:32:11] Weekend Testing Europe: What's your favourite?

[20/12/2015 16:32:32] Emma Keaveny: Obvs - TestBash

[20/12/2015 16:32:37] Emma Keaveny: but that's really the only one I have been to

[20/12/2015 16:32:51] Denise Bjornn: +1

[20/12/2015 16:32:56] Weekend Testing Europe: Emma, that's a good one.

[20/12/2015 16:32:57] Daniel Billing: Oh wow

[20/12/2015 16:33:03] Trisha agarwal: I wanted to go for the same and CAST . as I have never been and heard a lot

[20/12/2015 16:33:22] Weekend Testing Europe: I think CAST deserves a vote just because they stream all of their talks

[20/12/2015 16:33:26] Daniel Billing: Testbash is great BUT I've been to a few others now since my first testbash

[20/12/2015 16:33:38] Emma Keaveny: I would like to go to CAST and also Agile Testing Days

[20/12/2015 16:33:55] Daniel Billing: I went to my first Eurostar this year

[20/12/2015 16:34:07] Emma Keaveny: how did ya find it Dan?

[20/12/2015 16:34:09] Weekend Testing Europe: How was that, Dan?

[20/12/2015 16:34:19] Trisha agarwal: I have not attended any Conferences this year :(

[20/12/2015 16:34:33] Weekend Testing Europe: Trisha :(Have you got any planned for next year?

[20/12/2015 16:34:40] Daniel Billing: Well, it was exhausting, but a great experience. More corporate than most though

[20/12/2015 16:34:52] Emma Keaveny: is that a bad thing?

[20/12/2015 16:34:56] Weekend Testing Europe: I went to some great dev conferences this year. So nice to share testing with people who don't normally get to think about it

[20/12/2015 16:35:08] Trisha agarwal: Yes, i have to check and make sure to attend a min 2 conferences

[20/12/2015 16:35:45] Neil Taylor: that's interesting how in the dev conferences you have gone to how much emphasis is there on testing?

[20/12/2015 16:35:52] Daniel Billing: Do folks get support from their employers or time from their families?

[20/12/2015 16:36:05] Daniel Billing: I don't have kids so that makes it easier for me

[20/12/2015 16:36:27] Weekend Testing Europe: Neil, it varies. I went to UpFront Mini - I was the only tester but I met a developer there who had only attended because of my talk.

[20/12/2015 16:36:43] Trisha agarwal: +1 . That wow

[20/12/2015 16:36:43] Daniel Billing: It's a balance that my boss Rob has to manage all the time

[20/12/2015 16:36:47] Weekend Testing Europe: Continuous Delivery conferences like Pipeline and CD Conf have much more emphasis btu still very few testers

[20/12/2015 16:37:35] Weekend Testing Europe: I've been recommended to go to LeadDev next year. Apparently a good mix of testing + dev

[20/12/2015 16:37:54] Weekend Testing Europe: Balance is hard. My employer is supportive but still it's hard to fit conferences around work

[20/12/2015 16:38:23] Daniel Billing: Combo of budget and opportunities for other team members

[20/12/2015 16:38:44] Neil Taylor: That's good to hear, I think mixed conferences with both dev & testing is a good thing especially with more companies following a more agile approach to development.

[20/12/2015 16:38:46] Weekend Testing Europe: I always try to speak - that's the only way I can afford conferences

[20/12/2015 16:39:01] Weekend Testing Europe: Neil, exactly. Testing isn't really it's own thing anymore

[20/12/2015 16:39:45] Weekend Testing Europe: OK, we're out of time for this topic. Continue discussing or move on?

[20/12/2015 16:39:55] Emma Keaveny: move on :)

[20/12/2015 16:40:04] Daniel Billing: Move on

[20/12/2015 16:40:11] Trisha agarwal: +1

[20/12/2015 16:40:32] Weekend Testing Europe: OK "Effective ways of reviewing testing"

[20/12/2015 16:40:36] Weekend Testing Europe: discuss

[20/12/2015 16:41:56] Neil Taylor: that's was me. I was interested to understand how different folks approach reviewing testing that has been done with members of their team.

[20/12/2015 16:42:51] Weekend Testing Europe: So reviewing work from other testers?

[20/12/2015 16:42:57] Neil Taylor: yes.

[20/12/2015 16:43:05] Daniel Billing: Generally lots of note taking, mind mapping and debriefing

[20/12/2015 16:43:33] Daniel Billing: It's very important to do, as I mentioned earlier, one tester might see things another might not

[20/12/2015 16:43:57] Weekend Testing Europe: I actually don't do too much yet.

Note taking is our main plan but for now we work on very distinct teams so not much knowledge sharing taking place

[20/12/2015 16:44:34] Emma Keaveny: How come Amy?

[20/12/2015 16:44:39] Emma Keaveny: I thought that would be very important?

[20/12/2015 16:44:49] Trisha agarwal: +1

[20/12/2015 16:44:56] Weekend Testing Europe: Emma, just time I think. We're both busy on different projects

[20/12/2015 16:45:06] Emma Keaveny: ah I see

[20/12/2015 16:46:00] Weekend Testing Europe: I think learning is the main reason to do the knowledge sharing (for me). It's be nice to know we could cover each other if needed

[20/12/2015 16:46:17] Weekend Testing Europe: but that doesn't always get prioritised when we're in the heat of things

[20/12/2015 16:46:26] Emma Keaveny: yea...a new year resolution then :)

[20/12/2015 16:46:39] Emma Keaveny: I am not a fan of only one person knowing how something works...it should be spread!

[20/12/2015 16:46:49] Weekend Testing Europe: Yeah, definitely.

[20/12/2015 16:46:56] Denise Bjornn: I am beginning to see testing as very much a group activity.

[20/12/2015 16:47:00] Daniel Billing: My colleague Raji Bhamadipati did a workshop on note taking

[20/12/2015 16:47:05] Trisha agarwal: +1 Denise

[20/12/2015 16:47:06] Weekend Testing Europe: Although we have our development teams set up so they would pick up in the first instance

[20/12/2015 16:47:31] Daniel Billing: It was excellent and a great way to generate good discussions on how testing went

[20/12/2015 16:47:34] Emma Keaveny: it is Denise, more than one pair of eyes can be a great thing, and a different outlook

[20/12/2015 16:47:56] Emma Keaveny: We do a good bit of pair testing, and then there is also mob testing that has been talked about

[20/12/2015 16:48:00] Weekend Testing Europe: How do you currently review things, Neil?

[20/12/2015 16:48:16] Emma Keaveny: :D

[20/12/2015 16:49:02] Neil Taylor: Its relatively recent thing I have been doing, but we tend to record our testing on mindmaps and then have a review session to discuss what was tested, issues arising and I can put forward suggestions for other things that should/could be covered.

[20/12/2015 16:49:46] Weekend Testing Europe: Ah we do a similar thing with developers

[20/12/2015 16:49:49] Trisha agarwal: Test planning review ?

[20/12/2015 16:50:29] Trisha agarwal: +1 though a nice way . follow till end .

[20/12/2015 16:50:30] Weekend Testing Europe: I suppose reviews become increasingly important as teams grow

[20/12/2015 16:50:41] Trisha agarwal: Indeed

[20/12/2015 16:50:58] Weekend Testing Europe: Ok, we're out of time for this one. Move on or continue discussing?

[20/12/2015 16:51:06] Trisha agarwal: +1 Move on

[20/12/2015 16:51:07] Emma Keaveny: move on

[20/12/2015 16:51:08] Neil Taylor: move on

[20/12/2015 16:51:12] Denise Bjornn: +1

[20/12/2015 16:51:17] Daniel Billing: Yep

[20/12/2015 16:51:57] Weekend Testing Europe: "Working effectively with developers"

[20/12/2015 16:52:03] Weekend Testing Europe: Good topic

[20/12/2015 16:52:15] Daniel Billing: Another of mine

[20/12/2015 16:52:17] Daniel Billing: Sorry

[20/12/2015 16:52:34] Daniel Billing: I'm nailing these topics today

[20/12/2015 16:52:37] Weekend Testing Europe: :D

[20/12/2015 16:52:47] Emma Keaveny: lol

[20/12/2015 16:53:43] Daniel Billing: So...our devs all work in different ways, some are very test friendly, even do testing alongside their development. Others won't touch testing or testers with a barge pole

[20/12/2015 16:54:17] Daniel Billing: What are the challenges you guys have when working and communicating with developers

[20/12/2015 16:54:32] Weekend Testing Europe: I force testing on all my devs. Everyone has that expectation set during their interview process

[20/12/2015 16:54:38] Weekend Testing Europe: Helps that management agree with it

[20/12/2015 16:54:51] Daniel Billing: Good - we have the same expectation

[20/12/2015 16:55:07] Denise Bjornn: So maybe testers and developers would get along better if there was a better understanding about what the other does?

[20/12/2015 16:55:17] Weekend Testing Europe: Denise, yeah that's very true

[20/12/2015 16:55:17] Daniel Billing: We do a lot of talking with our devs

[20/12/2015 16:55:27] Trisha agarwal: getting influenced by dev / Where to have the appropriate communication /when not / make sure they are involved in our testing are different challenges

[20/12/2015 16:55:36] Daniel Billing: Breakdowns, three amigos, demos etc etc

[20/12/2015 16:56:07] Daniel Billing: Yes, Denise - historically there have been a lot of misconceptions between that by both parties

[20/12/2015 16:56:07] Weekend Testing Europe: Actually had an interesting conference meeting with a dev - he was frustrated that the testers wouldn't let him get involved. Sounded like they had very different testing expectations.

[20/12/2015 16:56:23] Weekend Testing Europe: Devs need test training too

[20/12/2015 16:56:29] Trisha agarwal: what are kind of testing are set for dev - Minimal acceptance criteria or something more ?

[20/12/2015 16:57:33] Weekend Testing Europe: I expect them to test acceptance criteria. Browser testing too

[20/12/2015 16:57:52] Trisha agarwal: okay .

[20/12/2015 16:58:32] Daniel Billing: Before they check their code in - code reviews with another dev, demos with all people involved, supporting testing by both dev and test, own the story or bug all the way to support and deploy to live

[20/12/2015 16:58:46] Weekend Testing Europe: So much of this comes down to communication. We spend a fair bit of time discussing what we're going to test and why. After that I expect them to do most of the testing.

[20/12/2015 16:58:56] Weekend Testing Europe: Dan - nice proces

[20/12/2015 16:59:09] Trisha agarwal: Nice +1

[20/12/2015 16:59:27] Daniel Billing: Yeah, it's all about the comms

[20/12/2015 16:59:36] Weekend Testing Europe: I also try to get developers involved in user support. It really helps them to think beyond code

[20/12/2015 17:00:06] Daniel Billing: I have good relationships with most if not all of the devs on our team, as we know the process and know we are all responsible for the code we create

[20/12/2015 17:00:11] Daniel Billing: Or products rather
[20/12/2015 17:00:18] Daniel Billing: No throwing over fences
[20/12/2015 17:00:27] Weekend Testing Europe: Destroy those fences!
[20/12/2015 17:00:35] Daniel Billing: No mud slinging or name/shame
[20/12/2015 17:00:41] Daniel Billing: Celebrate success
[20/12/2015 17:00:42] Weekend Testing Europe: It needs to be a team responsibility
[20/12/2015 17:01:00] Daniel Billing: +1
[20/12/2015 17:01:05] Weekend Testing Europe: ok, ready to move on?
[20/12/2015 17:01:33] Denise Bjornn: So there are departments to the final product, by my count there is coding, dev, testing...user support? Anything else?
[20/12/2015 17:02:05] Denise Bjornn: Snuck that in last minute, I apologize lol
[20/12/2015 17:02:09] Emma Keaveny: There are areas throughout the product
[20/12/2015 17:02:12] Weekend Testing Europe: lol that's ok
[20/12/2015 17:02:34] Weekend Testing Europe: There is also infrastructure and product management (or business analysis)
[20/12/2015 17:03:06] Emma Keaveny: Dont forget the users themselves
[20/12/2015 17:03:20] Emma Keaveny: feedback is always good...altho not always easy to get a hold of
[20/12/2015 17:03:54] Emma Keaveny: you can almost say that creating / testing a product starts at the very beginning and never really ends
[20/12/2015 17:03:55] Emma Keaveny: lol
[20/12/2015 17:03:56] Denise Bjornn: The last tester will always be the user ;)
[20/12/2015 17:04:05] Emma Keaveny: :D
[20/12/2015 17:04:12] Emma Keaveny: well they wont be the last :)
[20/12/2015 17:04:38] Emma Keaveny: ideally you should be able to demo what ya created/tested in certain parts of the product lifecycle to ensure it is what the user/ stakeholder wants
[20/12/2015 17:05:34] Weekend Testing Europe: ok.....moving on to "How important is it to know every aspect of the product you're testing?"
[20/12/2015 17:06:57] Trisha agarwal: +2
[20/12/2015 17:08:14] Daniel Billing: Toughie. If it's a complex system, you can't know all of it
[20/12/2015 17:08:37] Daniel Billing: especially if it changes all the time
[20/12/2015 17:08:38] Trisha agarwal: +10
[20/12/2015 17:08:58] Weekend Testing Europe: I think this is why I love mindmapping with developers so much. It takes the pressure off me knowing everything
[20/12/2015 17:09:10] Weekend Testing Europe: some leading questions can be enough to get them thinking about risks
[20/12/2015 17:09:10] Emma Keaveny: :)
[20/12/2015 17:09:21] Daniel Billing: Even the devs don't know everything about the system
[20/12/2015 17:09:42] Denise Bjornn: I suppose that would depend on the way you are testing the product right? If you are group testing, maybe it's only necessary to know the bit you are in charge of? Otherwise why deviate the project between numerous testers at all if not to separate the product into testable sections?
[20/12/2015 17:09:46] Weekend Testing Europe: Maybe not always. Sometimes they do. Those few times are always a relief
[20/12/2015 17:09:48] Daniel Billing: They are always going to other devs, either more experienced ones or specialists who do
[20/12/2015 17:10:08] Weekend Testing Europe: Sometimes you might have

systems that no one fully understands

[20/12/2015 17:10:14] Weekend Testing Europe: That's tough to deal with

[20/12/2015 17:11:00] Weekend Testing Europe: So I think we all agree that "no" you don't have to know every aspect. Life is easier when you do know more though

[20/12/2015 17:11:10] Weekend Testing Europe: Anyone got ways of discovering the different aspects?

[20/12/2015 17:11:25] Daniel Billing: Observe

[20/12/2015 17:11:25] Daniel Billing: Ask questions

[20/12/2015 17:11:31] Daniel Billing: Learn

[20/12/2015 17:11:39] Daniel Billing: Don't make assumptions

[20/12/2015 17:11:55] Trisha agarwal: +1 Dan .. we miss out them

[20/12/2015 17:11:58] Emma Keaveny: talk through user stories ..if available

[20/12/2015 17:12:59] Weekend Testing Europe: (y)

[20/12/2015 17:13:18] Weekend Testing Europe: I like trying to link up different stories, bugs, conversations

[20/12/2015 17:13:22] Trisha agarwal: +1

[20/12/2015 17:13:27] Weekend Testing Europe: The connections help me build a picture of the system

[20/12/2015 17:13:43] Emma Keaveny: (y)

[20/12/2015 17:14:33] Weekend Testing Europe: OK we're heading towards the end of today's session. I feel like we should end with some new year resolutions or something. Anyone planned theirs already?

[20/12/2015 17:15:04] Weekend Testing Europe: I'm planning to focus on writing next year. My blog took a back seat this year. Really want to have a regular writing routine

[20/12/2015 17:15:24] Trisha agarwal: +1

[20/12/2015 17:15:41] Emma Keaveny: Thats a good one Amy, I am hoping to do the same as well...

[20/12/2015 17:15:56] Daniel Billing: I'm starting a book myself

[20/12/2015 17:15:57] Emma Keaveny: I just want to keep doing what I have done this year...

[20/12/2015 17:15:58] Denise Bjornn: I'd like to attend more of these and pick your brain clean ;)

[20/12/2015 17:16:10] Weekend Testing Europe: ooo, Dan! That sounds exciting

[20/12/2015 17:16:11] Daniel Billing: And more conferences of course

[20/12/2015 17:16:11] Emma Keaveny: keep the enthusiasm and be not afraid to try something new and learn something new :)

[20/12/2015 17:16:21] Weekend Testing Europe: Yey Denise. Great resolution :D

[20/12/2015 17:16:26] Daniel Billing: And more stuff for The Dojo - in January

[20/12/2015 17:16:27] Emma Keaveny: I think Denise may be a testing zombie ;)

[20/12/2015 17:16:34] Weekend Testing Europe: lol

[20/12/2015 17:16:45] Weekend Testing Europe: Is that like a bot?

[20/12/2015 17:17:05] Weekend Testing Europe: Fewer conferences for me next year. Need to focus at work, we have some major work coming up

[20/12/2015 17:17:08] Denise Bjornn: Nom nom nom :D

[20/12/2015 17:17:11] Emma Keaveny: lol

[20/12/2015 17:17:17] Emma Keaveny: ooo Amy you are a busy lady!

[20/12/2015 17:17:30] Daniel Billing: You'll be at testbash to Amy, right?

[20/12/2015 17:17:35] Daniel Billing: Though?

[20/12/2015 17:17:41] Weekend Testing Europe: I will be at testbash :)

[20/12/2015 17:17:44] Emma Keaveny: :D

[20/12/2015 17:17:45] Weekend Testing Europe: Can't miss that one

[20/12/2015 17:17:45] Daniel Billing: Phew
[20/12/2015 17:19:34] Daniel Billing: WTEU has been great this year
[20/12/2015 17:19:44] Emma Keaveny: it has been great, thanks Amy :)
[20/12/2015 17:19:45] Trisha agarwal: +100
[20/12/2015 17:19:52] Emma Keaveny: here is to more in the new year :)
[20/12/2015 17:19:57] Weekend Testing Europe: Thanks to you all. We couldn't do it without you!
[20/12/2015 17:20:07] Emma Keaveny: feeling the festive love
[20/12/2015 17:20:08] Trisha agarwal: thank you everyone :)
[20/12/2015 17:20:09] Daniel Billing: Neil, Amy and I will be meeting soon I hope to plan 2016
[20/12/2015 17:20:17] Emma Keaveny: Woohoooo Dan :)
[20/12/2015 17:20:20] Emma Keaveny: cant wait
[20/12/2015 17:20:25] Trisha agarwal: (festiveparty)
[20/12/2015 17:20:29] Weekend Testing Europe: Yey, session planning
[20/12/2015 17:20:49] Daniel Billing: But let's get Christmas and New Year out of the way first
[20/12/2015 17:20:50] Weekend Testing Europe: Have a great holidays everyone. Hope you're all getting rest, festivities, and fun
[20/12/2015 17:21:02] Neil Taylor: I've really enjoyed the sessions you have done over the course of the year - not been able to get to all of them unfortunately.
[20/12/2015 17:21:06] Emma Keaveny: Merry Christmas everyone!! :)
[20/12/2015 17:21:07] Weekend Testing Europe: Thanks for joining us today
[20/12/2015 17:21:21] Weekend Testing Europe: Thanks Neil. Good to hear.
[20/12/2015 17:21:24] Daniel Billing: Thanks all for a great 2015
[20/12/2015 17:21:45] Weekend Testing Europe: (xmastree)
[20/12/2015 17:22:00] Daniel Billing: (champagne)
[20/12/2015 17:22:11] Weekend Testing Europe: (reindeer)
[20/12/2015 17:22:18] Neil Taylor: Thanks & Happy Christmas (santa)
[20/12/2015 17:22:22] Weekend Testing Europe: The next session will be emoji only
[20/12/2015 17:22:27] Trisha agarwal: lol
[20/12/2015 17:22:47] Trisha agarwal: i just like skype emoji , so 110 % ready
[20/12/2015 17:22:57] Weekend Testing Europe: I think it could work
[20/12/2015 17:23:09] Weekend Testing Europe: Hopefully I won't be facilitating though
[20/12/2015 17:23:14] Trisha agarwal: lol
[20/12/2015 17:23:23] Weekend Testing Europe: See you next year everyone!
[20/12/2015 17:23:32] Emma Keaveny: Good night everyone
[20/12/2015 17:23:32] Trisha agarwal: Thank you amy
[20/12/2015 17:23:35] Emma Keaveny: See ya next year :)
[20/12/2015 17:23:39] Emma Keaveny: Thank you again :)
[20/12/2015 17:23:42] Trisha agarwal: Good Night Emma :)
[20/12/2015 17:23:43] Denise Bjornn: Good night :)
[20/12/2015 17:23:56] Trisha agarwal: Good Night Denise .
