

Weekend Testing WT 125: Analyze Requirements

Product Requirements - <https://support.google.com/keep/#topic=6262468>

Supported Platforms – Computer, Android, iPhone & iPad

Questions

1. Is Google Keep Compatible on mobile browsers?
2. What are the languages supported for note taking?
3. Can multiple users edit a shared note at the same time?
4. Notes can be shared with only Google accounts or any email id other than google?
5. Can any user other than the owner delete a note?
6. Is there an extension available for other browsers?
7. What will be behavior when we use app on non-supported setup?
8. Can we set user specific reminder for a shared note?

Test Ideas –

1. Test the app on computer with different platforms (Windows, Mac, Linux), different browsers (Chrome, Firefox, Safari, IE, Microsoft Edge) and browser version (2 most recent versions)
2. Test the app on Android devices with different OS (Android v5.0 and above), different screen sizes and resolution
3. Test the app on iPhone devices with different OS (iOS 10 and above), different screen sizes and resolution
4. Share a note with users in different time zones and verify the note editing time as per the different time zones
