

## Rishi

### Basic use case -

- To add a note/reminder/any piece of information
- able to sync to Google and use it anywhere
- can use in mobile, browsers iPhone

### 1-landing page

- Draw
- record
- add image
- create new
- existing notes

### 2-features

- pin
- set reminder
- archive
- undo
- collaboration
- share
- add attachment
  - take pic, add image, record, drawing, trick box

- add label
- add color
- pin
- delete
- make a copy
- copy to Google Docs
- drag the notes
- list and grid view
- sync status indicator
- 

### Search

- using key words, label,color, reminder, drawing

### Issues/RFA

- URL support - hyperlink
- word checking (spelling)
- front styles, size and bold etc..
- auto remove after reminder expiry-good to have
- no resize option for notes in landing page
